

Call for Contributions for the 13th EuCo-CTC: <https://eucoctc2021.mke.org.hu>

e-EuCo-CTC 2021
Online conference
EuChemS Division of
Computational and Theoretical Chemistry
November 18-19, 2021, 2-6 pm CET

The European Conference on Computational and Theoretical Chemistry (EuCo-CTC), established in 1994, is a platform for scientists in academia, industry and governmental institutions to showcase recent advances, developments and trends in molecular modeling, simulation, and related areas. The EuCo series of conferences is organized by the EuChemS Division of Computational and Theoretical Chemistry (DCTC).

Instead of postponing the planned 2021 event, we decided to hold a small online conference, *i.e.* the e-EuCo-CTC, taking place on November 18-19, 2021. The 14th EuCo-CTC will take place as a physical meeting in Thessaloniki (Greece) in 2023.

In all four thematic sessions of the e-EuCo-CTC (Materials, Electronic Structure, AI in Chemical Research, Biomolecular Systems), following the keynote lecture, we have four **slots for contributed lectures**, 15 minutes + 5 minutes discussion each.

If you are interested to present your research as a contributed lecture, please submit title and abstract of your presentation using the Registration Portal of the e-EuCo-CTC.

The deadline for abstract submission is Thursday, October 31. Notification of acceptance is planned for November 5.

Participation at the e-EuCo-CTC is free of charge. Please note we do not offer an online poster session.

We are looking forward to receiving your contributions!

The organizers of the e-EuCo-CTC,

Zoe Cournia (chair), Hans Peter Lüthi (co-chair), Benoît Champagne, Mercè Deumal Sole, Ivelina Georgieva, Stefan M. Kast, Tanja van Mourik, Radu Silaghi-Dumitrescu, Péter G Szalay (DCTC chair)
